THE PRESENT QUARTER,

Seattle Chronicle, Det. 23.

A day or two since file 'Chronicle copyed an editorial from This Gazgourian which apoke very finality and very druthfully about the manner in which freight seattless for Stattles was delayed at Tacoura, obtyped by boat when ordered by mil, and generally handled to the expense and hoodwestence, of the shipped. The Tacoura Ledger also cooked the article, and comments upon it as follows:

If the charges were true they would be properly the subject of complaid; but they are not true. The course taken by freight shipped from Portland to Seattle depends entirely upon the instructions given by the shipper. If preliab intended for Seat-bid by Block from Portland to Tucous, then it is not be blied from Portland to Tucous, then it is not be blied from Portland to Essatis, it goes through, all still, it Seattle. The railroad conjouny routs all shipments exactly as directed by shippers. It is to the interest of the railroad conjouny to forward freight intended for Seattle by sail. By so doing in same the freight on a hand of seventeen miles, from Tacoura to Sancta Junction. The Seattle train is run regularly, and all freight diverted from the O. R. & N. company's boats represents clear profit to the railroad company.

The Ledger is talking of something of which it knows absolutely nothing. It is with no other apirit than that of business friendliness, and a deere to be properly served, that the manner and the profits of the manner and and the manner and t

it knows absolutely nothing. It is with no other spirit than that of business friendliness, and a desire to be properly served that the merchants of Seattle have time and again protested against the manifer in which freight has been mishandled at Racoma. The account given by The Carsonnar is true, and there are decrees of membants in Seattle who can testify and have testified to its correctness. "All the membants of Seattle Seattle who can testify and they will not be found making respitous criticians if anything this fairness seems to guide the railroad managers. The trade-of misshipped, delayed and divided freight had grown so serious that one of five consessions was forced upon us—this fairness assessed on the Northern racific is andorn use in helding a tot of carden and incompetent specifies. Tone of freight have arrived by look at Seattle, every package of which was ableed and maked via the Shorts line road, and if the depot men at Trooma are not under notice in resembly perform there is not under notation to misship freight they are totally incompetent to repectly perform there is not under notation in these with the Ladger that the Northern Rachar raftroad intends to not only be fair, but we also believe that somewhere in its food management there is a man with a little belot as also believe that somewhere in its food management there is a man with a little belot as lited by who has practiced the discriminations of spitch the merchants of Seattle complain.

Frow that the matter use been so publicly discussed we hope to see things arranged to the satisfaction of both sides.

Visiting like a select actues and subsequently the Prefine coact his diterary aspirations were reavalened by the appreciation and encorragement of persons written in American authoriship, among whom Frances Hogdson Burnett and licien Hunt Jackson were specially attracted by his person d and spiritual graces.

He had a singularly modest estimate of his own children. He had written much, both prove and verse, but the only thing he eyer offered for gualication before "Lyddy," was a little story about two children and against ball, which went the rounds of he press under the siltle "Taser and Taby"—a skeich full-of the simple directness and heart-breaking pathos which seeme I his distinctive zirk.

Returning from California some months ago he actifed it St. faul with his mother and sister, where he was engaged in the practice of his professioli at the drue of his death. FEGRESIDENTIAL SUCCESSION. The fact that this government has been to

existence nearly a century without a definite and entire actory arrangement of the order of succession to the chief executive office in the cars of extraordinary vacandy, lliustrates the fartifier the people in our rational idea and their car fierce in the power of that it is regulate be unformational conduct. A people who regulate the unsupation or fraud in connection cassion as a thing withn the outles of possibility would not taintries I to the most remote possibility as to the nuccession; and even in the present struction, they would be filled with alarm. The existing make-shift arrangement, which de-volves its executive office in certain contingenvenis: one. It was adopted originally in opposition to the opinion of Mr. Madison and in opposit re. to the iopinion of the first house. I representatives, of which he was the leaden. It was adopted as the result of a continuance of the old contributy in the nvention which framed the constitution, of no create for he equality of the small states the government as against the claim that the on his hair population. The scale was turned, low-ref. In favor of the adoptor of the existing michiple by fealousy on artifaced toward for Afferson by the leading fe is all its of the first scirries tration; and underlyedly but for the apprehension of the growing public influence of Thomas Jefferson and of the political opin one for which he was the representative, the provision would have been made in the first

mr. M. Hear, of Massachusetts, has introduced into the senate of bill fixing the order of succes-tion, sin tely and providing for extremelys which may are by any possibility. The bit provides for two a images in the existing law. First, it may be the first than the existing law. First, it contains a fair for the president pro tempore of the enumerated the speaked of the house as the contains and the speaked of the house as the Higher upon whom the duties of president that divide in case of a vacancy in the office on the first med vice-precident, the machers of the anxiest is the order of their official se-niors, its order in which the various depart-ment where counted, except that the head of the department of justice, which is the last departen created by law, is continued to his old place as yet by take, is contained in its of the beads of the depic ments created since the original establishment of the cathet. Following is the order. The secretary of state, the secretary of the feature, the secretary of war, the tirreversers, the postmatter-general, : a co itionous period of fourteen years pre ous, would, of course, be incligable to succeed b the fresidency; and the bill excludes secreta-les appointed foring the recess of congress with six the strice and consect of the sepate, as well as at who may be under impeachment. A abluer officer succeeding to the presidency

congress that the secretary of state should succeed to the executive function in case of a va-

quinted these successful to the president, but would would simply jesform the duties of chief executive, whis boilding the office of calinet member. This plan is supported by many important considerations, and is we believe the best that has stormann, and is we construct the construct has a more physical matter a would be inconvenient if not impossible if the act ing president to not also as pre-tiding joft.cer of the senate, and it would be most anseemly for the president of the United now an early to the product of the genete and pre-dide ager discussions with regard to his own nom-nations to office, he being an equal in the put ime authority the representatives of a party which had been defeated before the people. ha presant situatior—U. Mr. Cipvelanc were by i. le, Mr. Sherman, a republican, would be pastignt. Mr. Hoarargues with great point that where a mr. is elected to the presidency it is retice much the purpose of the American people to confer honor and authority upon an Indix just, or to put confidence in an Individual, as it it proportice that certain policies, cartain seigneles, seriain opinious on green public questions in which the country has an interest shall regard and have the assendency in its wi-substration for four years. It is urged, too, that it is milke y that any percent desiring to accomplish by clime a change of the political administration of the country would ever assessment a president to cause the accession to the presidency of his chief political access and trient. Guiteau would hard! have tried to elevate Mr. Blaine, and Booth would hardly have tried to the chief to the chief political access the second

tried to slevate Mr. Seward.

In apposition to this plan is the very important of efector that it might devolve the presidence for nearly an entire term upon a man not selevant by the people, nor. In any manner considered by them n connect or white the presidential office. Still, a man not of the first rank and soi in high sesteem with his party and with the conercy, could not be made seem try of state. A dat of the gentlemen who have held; the state contains the name of his way and this post contains the names of six who speseeded to the presidency and occupied that office costons. In the presencing and occupies and coince for that; rains, And thee; is scarcely one who has not been in the thoughts and minds of his countrymen as a person miles to the execu-tive effice. It was reported by bliggraph a few days age from Washington to at the secretary of the interior had ruled that mixed bloods have equal reservation rights with full blood Indians. This decision, which is not new, being in line with the relings of former years, was secured by Thomas Paige, a white man with a ball breed wife and several quarter-blood children, who now leves with this family upon the Unaudis reservation in this state. Unquestionaby the wife and children of Page can hold reservation lands under the rule, but this does not give Page himself reservation rights, and he and others like him ought not to be allowed to live

of the restriction of the restriction of the restriction of the restriction.

The ruling itself, as it applies to women of whole or mixed blood, who are wives of white men, is a most impoper one, both in principle and in consideration of its effect. The condition of the wife follows that of the husband is every civilized society, and this principle orght to apply to mattimonal conditions between waits men and Indian women. The effect, if white nen married to shawe be allowed to remain on reservations and enjoy the rights and privileges due midpr the rule to their wives and hildren, is to jout a primitim upon these into agracus and degraded connections, and to attach to the Indian communities men whose interests are amaginistic to every scheme to elerate the Indians, and whose indicance (rules are the Indians, and the Indians (Indians). naturally will be in opposition to cly izing

WASHINGTON JURIES AGAIN.

The report of the attainer-general furnishes some interesting facts coherening juties of the District of Columbia to which, it may be remeabered, we alluced briefly a few Lays back. The law requires that the jury-list shall be made up from residents of the destrict. These exampt from duty are officers of and persons in the employ of the government, persons connected with the police and fire determents, lawyers ministers, they example the police and fire determents, lawyers of hospitals, asylums, alon houses and people applyonation river craft. In Washington, which is merely an official and pe kical camp, withour regular industries or business, and whose one licial residents even are for he most part citizens of the var ous tates, these exampt classes include almost the whole porpilation. There are left only the ing-lag and cramb-picking classes who he by one species of exhonesty or another, upon the government. The report of the attenney-general furnishes inemmessing of another upon the government. Juries made up from such material are insen-sible to the dioral of other considerations which have weight with honorable men. With them, the man most guilty in cases where the government is the offenced party, is the greatest, her. And yet, this condition of affairs being the wn, the national treasury is confided so ely to the protection of the district courts. Cases involving national interests should never be tried before local juries, and there ought to ba-no delay in making a change so urgently re-quired by the public interest.

I set week the trustees of the Mercantile !!brrry, of San Francisco, reduced the monthly membership fee from \$1 to 50 cents, thus mak-ing the searly rate \$6 inward of \$12. The laing the searly rate to instead of 1812. The in-fection fee is \$1, and with the quarterly dies, \$1 50, is gayable in advance. We believe the time has come when the Portland Liorary asso-cial ion should do likewise. The pr vileges of the library are now practically denied to many who could and would ghadly pay half the preswho could and would gainly my half this pres-ent membership task, or 30 touts per month. We believe a reduction of the subscription rate would add to the membership, and if, for a time, it would somewhat decrease the become of he association; it would certainly make the benefits pure general. And this, after all, it the main purpose of the lingary. Propositions of his kind herotofoce have then met with very good business arguments, which are quite as ap-plicable now as, at any former time; but it should be remembered that he library is not organized or conducted on business principles nor for business purposes. It is a creation of berevolence for the general good and the wider its advantages are made the botter if will fulfill

The question in Azinta, he said, had been whisky shope should be shut up and their trade assumed by his drug stores. One of the principal arguments of the prolititionies mis been that closing liquorishops would not stoo the sais of liquor. When it was announced that the lesses would include the drug store, they sait any a wall for the poor baby with the colle who in his hateful prohibitionists would deprive of his whist will be the property of the standard his appoint of the wine for their stomach's saide. The senator said in humanity to drink a little wine for their stomach's saide. The senator said he had never combutted this argument. He was willing to admit what the New Testament said, but do what wine did the serratures refer? Not to the gunt benzolne, the principal city, the dog sood the wesseld as wine.

The senator picturell in contemption to the the saide of its "boday." Every drop at the real wine was a drunk bylogay by he said, ac i the said they sent to Aubertea was this "Say I's

to jungs the quality of the contents; who suitfed it had talked of its "bokgy." Every drop of the real wine was drank hydrogs by he said, act the staff they sent to Aderica was this "hav by sopin not use the sneaton. He was willing to compromise; with the anti-prolifitionist on the wine of the artipures, the ladinest piles of the grape.

Another anguinent used by the opposition of mines for a minest was that work bitton was an invasion of their rights as free American citizens. They distributed their and they are after which the senator thought very suggest we of red checks and noses, beating the world "Liberty." The senator todd a bitte stary of the wife's encounter with an old "artig" wearing one of these targes, "what it we you there, Auntier" said M.A. Colquit. "Had badee," was the reply. "Abat is that on the two the churches and by every munister, "for what is very the said the calculations of the churches and by every munister, "of whithere co, n," in the city-stage one why was a niggro, "and he wasn't much of a preact.er," A great any had been won of er from them by the argument that prohibition would have the commerce of the city. The senator said twiss its first time he had real zed that the mere drunkarie the greater a city's propertie he work the probleminated, hopeless "widders" it egreator is commercial importance, In crach should be comediated a light compliment to the women of Atlanta. He was requested to give the prohibitionist another "walk" on Friday evening and will probably do so.

Hearing the noise of swift'y running horses coming up the road, Saly went to the froat door and saw the Union tatrol dath by Cose upon their heels was the sound of a body of cavalry riding at a gallop. A jain the bagis in the adjacent piece of woods rang out decisively in repeated orders. A part of the min dismounted and their horses were let to the rear. Another detachment moved off to the right. Then Sally saw across he parry w doorya.d a troop of gray, shadowy forms sweeping by, and there was a steely gleam of what appeared in-numerable sabres in the cawn. The road was full of rushing steeds as far downward as she could see, and her Southern blood glow but in proud expitation at the r impetacus alvages. Then, in sudden revolsion, came polgonut regret at the probable face of her recent protector. Hall events moved with such marvelous color-

From the gloom of the words bandreds dashes leaped out and the quick reports of Sharp's repeating carbine grew almost dealen-Soon t orses came careering back rideriess. The swift enset was checked, for no surprise had been effected. These for a time came a stubborn light, the Confederates slowly driving the dismounted troopers before them.

The road in front of Sal 3's rome was still full of men in gray, and they now began to bea down a rail fence and leptoy into the adiacen; field with the purpose of setting around on the Union forces' flank. Whi e this maneurer was being executed there bury: from the woods a column of blue in a headleng charge. The Confederates were taken at a disadvat toge, receiv-tog a flank attack themsel es instead of delivering one. They fought brevely, as was their castom, but were steadily pressed back. The filling

No doubt Pather Ecks was right, and I had merely fallen seleep and had an agir drawn. The interest aroused by the primes's remarks had prevented most of the guests from observing—what had, nevertheless, not eached my own notice—that Mrs. Evrasay had been surammond from the room almost at the opening of his harangot. A servant, with a troubled arpression on his features, had made his way to hear, side and whispered constituing in her ear, that had caused her to start and change color, and also to slip from the table as quietly as she might. Her absence new beyon to be noted; but the primes, with thoughing and chapters on the lating, in temporary forgetfulness of her unexplained departure.

This happy state of things was suddenly disturbed, however, by a loud shriek from one campination a great dot of how as found upon her otherwise immanulate bason. AN ITALIAN OITY'S WATER-WORKS. What a Pure Water Supply has Done for Maples

Exemption of the city from CholeraThe Lancet of London approciates the importance of the water-works of Naples, which were formally opened by King Humbert in May of this year. The Lancet at once recognized the great benefit these improvements have proved to Naples, for it says: "It is not a little remarkable, considering the cholera of 1884, that it (Naples) should have escaped a escond visit from the ecourge which has declinated the fairest provinces of Spain. The Emptila will not find it difficult to believe that the immunity from cholera in Naples is due to the parity from cholera in Naples is due to the parity

The distribution throughout the city is by means of iron pipes, varying in diameter from three feet to three inches. The pipes, form a comparatively close network in the city and anapty even the poorest parts. The supply of water is equal to about 10,000 tanks meless per dismassive or nearly double that which is most sarry. The writer also tells as that whatever liability to fever there was in former times in Maples, was owing 'to the outs desome, the liability of the city to water-carried zymotics ought to vanish absolutely." The Lances will be gind to know that most careful and critical analyses of the water from the Appenines show that it is far purer than the best-water of Herne, and is equal to the water of Berlin, which enjoys the high est reputation in Europe. The erion-water (the new supply) is remarkably free from organisms of any kind.

The writer of this important artic e says: "Naples, with its unrivated advantages to the shape of climate, aspect, and the unique the part is completely in Europe. This, we think, it is shape of climate, aspect, and the unique alteriors with the countenance of the King, art doing their best to make it so. endistrong and poor, Eben's folks had ten

children, so it behowed him to play cound and

get nil his old lather's hands. I hadn's any-

and when it come to it that he made up his mind to ctear up a spot in the north woods and make it home up there, he hazed me to go along and I said I would. I'd been to sugar camps

and I said I would. I'd been to sugar camps too mich to be alrad of livin' in a bar's shanky, and then I set by Eben considerable. So we went up one day in the spring, by stage as, for as we could, then hessback, for his folks gir us a boss and a cow, so I rode one and drow 'jother, first by a sort of a road, and then up a track to where the 'was an intervale and a big

apring: he'd been up there the rear before, and built a tig shimty in a barn, and sowed corn into the intervale, and backed the most of it

itto the intervale, and backed the most of it down to the road and so to the neares mill, so's we had rieal and in let to live ord, but we had to sell the hose, once ploughla? was done, we couldn't keep him. Dear me', how it late. But when I think of them old times seems as though

I couldn't stop.

Well, lays and years went on; we had six children born up the e in the woods hoys all of

Astandard Christmas John is the story of the blander of a French cook who took services on an entired bound East Indiaman. The festival fall while the ship was bundreds of unless from an entrain the the ship was bundreds of miles from laid and, meditaring a surprise for homestak fagish passengers, he begged a recipe; for plane guidang from a lady on board. Three days of preparation and six hours of execution resulted in some gailons of brown portidge, streaked, speckled and spotted, complainently streaked, speckled and spotted, complainently seried up in big bowls. His confidants and ally had togotien to mention the pudding bag—taking t for gunted as do many other excellent hoises was that "everybody knews as methings." As pudding, the Gallic chall's exploit was a lower. A M nisterial Crisis Impending in THE TONQUIN CREDIT ADOPTED

Pakis, Dec. 21.—The vote on the Touquin credit is virtually a defeat for the government, twenty-four conservatives, who would have opposed the credit, having been deprived of their easts. A actinus council has been supermoned for to 100 row. The ministens will perhaps us than their portfolios could after the meeting of the congress to elect a president of the re-public.
